STRATEGIC COMMUNICATIONS

Worked within the strategic communications portfolio at Joint Operations Head Office, a Defence business entrusted with the planning and conduct of national business activities and coordination of international involvement with the US, UK, NZ and regional partners.

On a daily basis, this complex Defence business manages multiple overseas operations, tri-service deployments and major projects involving 30,000 staff.

Senior Manager, Communications

Invited to take up this challenging appointment by the Managing Director of Communication, Bob Dillon, at a time when Defence was looking to review communication policy, capability and training.

Provided specialist advice on communications and security planning to senior executives, encompassing capability, contingency planning and the conduct of a broad range of sensitive operations.

Responsible for human resources, training, policy development, finance, capability development and strategic advice.

Highlights

Appointed Chairman of the tri-service, multinational working group on communications security, with the charter to examine current issues and future directions for communications in Australia in both the military and civilian contexts.

Developed, reviewed and advise upon strategic and operational policy, chairing the committee that signed off on such changes. Represented Defence's communications interests in the broader national and international communities.

Coordinated multinational exercises involving numerous countries, multiple services and 80 business units with over 2,500 people. Recommended new training scenarios to ensure operational readiness in support of a broad range of contingencies.

Liaised with National Fleet Managers regarding the testing, evaluation and acquisition of all military communications equipment. Oversaw feasibility studies for the introduction of new equipment nationally, including development of implementation plans.

Privileged to lead highly specialised operational teams. Held the concurrent appointment of Physical Account Manager for equipment and materiel, with responsibility for sensitive and classified assets.

IT&C SERVICES

Located in Butterworth, 324 Support Squadron provides logistic, communication and health support to Defence businesses deployed throughout Malaysia and Singapore. The Squadron played a key role in Tsunami relief, rebuilding Banda Aceh.

The IT&C division of this international team caters to the needs of a domestic and international clientele, including IT management, telco networks, mobile communications and equipment evaluation.
